# Data+ Management Software

Streamline Your Data

Up to 20X's Faster Processing

Eliminate the need to enter data manually on a terminal, and skip directly to entering data on a PC. By streamlining this process, you save effort and increase processing speed up to 20X's.

Up to 15% Faster Reporting

User-friendly reporting functionality gets your reports completed faster, especially when compared regular manual programs. This reduces your time spent generating reports and allows for faster reaction time.

Up to 50% Faster Workflows

Increase process efficiency by downloading terminal parameters, article database & other important metrics to your scale directly from your PC. This centralized setup helps to eliminate redundancies in your process.

Trouble-Free Audits

Use Data+ across multiple machines to improve consistency in processing and reporting. Achieve consistent quality that is reliable and easily traceable especially during an audit.

Streamline Your Data Management
30,000 Reasons Why

Do not let your software limit your capabilities - Streamline your data management with a single software, which can store, control and amend up to 30,000 records from your desk. Data+ allows you to spend your time on more valuable workflows instead of wasting time on manual tasks.

Additional benefits & features include:

- ICS and IND terminal application support
- Integrated device transaction logs
- Multi-terminal-use
- Increased traceability
- ERP/MES data exchange
- Time-saving work-steps

METTLER TOLEDO

Data+
## Data Management Software

Data+ is available in a free Lite edition as well as a Full edition. The following Terminals and applications are supported:
- ICS4 and ICS6-series terminals
- IND560, 570, 500x and 780 terminals

Applications:
- Formulation, Pick&Pack, workflows of up to 50 ingredients
- Counting, counting of parts
- Check-weighing, checking consistency of packaged commodities
- Application PAC Fill-570 for filling automation, workflow for up to 6 materials
- Application PAC Drive-570 for truck tare workflow

Data+

Technical Features
Data+ and Data+ Lite

Feature/Function	Data+ Lite	Data+
Backup/restore setup	●	●
Database import, export, & edit (csv)	●	●
Ethernet WLAN option	●	●
Multi language support	●	●
Serial connection (RS232, USB device)	●	●
Windows 7/10 compatibility	●	●
APW sychronication		●
Connect Multiple devices		●
Create, edit & delete articles		●
Create, edit & delete formula recipes		●
Create, edit & delete Pick&Pack BOMs		●
Datatbase backup/restore		●
Host Database Mode* (ICS68_)		●
Legacy Article migration		●
Memory (alibi/transaction) download		●
Multiple databases		●

*Central Database on a server for up to 100 terminals host database & local serial connection up to 5 terminals
